# 1. INTRODUCTION

## 1.1 Background

The Council is required to operate a balanced budget, which broadly means that cash raised during the year will meet cash expenditure. Part of the treasury management operation is to ensure that this cash flow is adequately planned, with cash being available when it is needed. Surplus monies are invested in low-risk counterparties or instruments commensurate with the Council's low risk appetite, providing adequate liquidity initially before considering investment return.

The second main function of the treasury management service is the funding of the Council's capital plans. These capital plans provide a guide to the borrowing need of the Council, essentially the longer-term cash flow planning, to ensure that the Council can meet its capital spending obligations. This management of longer-term cash may involve arranging long or short-term loans or using longer-term cash flow surpluses. On occasion, when it is prudent and economic, any debt previously drawn may be restructured to meet Council risk or cost objectives.

The Council's Corporate Plan identifies the Corporate Objectives of the Council, and which then informs capital investment requirements. The 2024/25 to 2028/29 Capital Programme includes capital investment which will require resourcing, from revenue, earmarked reserves, capital receipts, grant income, and borrowing.

The contribution the treasury management function makes to the authority is critical, as the balance of debt and investment operations ensure liquidity or the ability to meet spending commitments as they fall due, either on day-to-day revenue or for larger capital projects. The treasury operations will see a balance of the interest costs of debt and the investment income arising from cash deposits affecting the available budget. Since cash balances generally result from reserves and balances, it is paramount to ensure adequate security of the sums invested, as a loss of principal will in effect result in a loss to the General Fund Balance.

Whilst any commercial initiatives or loans to third parties will impact on the treasury function, these activities are generally classed as non-treasury activities, (arising usually from capital expenditure), and are separate from the day-to-day treasury management activities.

The Chartered Institute of Public Finance and Accountancy (CIPFA) defines treasury management as.

*“The management of the local authority's borrowing, investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.”*

The treasury management activity involves substantial sums of money, which it borrows and invests. This exposes the Council to potential large financial risk, which can include the loss of invested funds, or the revenue consequence of changes in interest rates. Therefore, the successful identification, control and monitoring of risk are integral to this function and include credit and counterparty risk, liquidity risk, market or interest rate risk, refinancing risk and legal and regulatory risk.

## **1.2 Reporting Requirements**

### **1.2.1 Capital Investment Strategy**

The CIPFA 2021 Prudential and Treasury Management Codes require all Local Authorities to prepare a capital investment strategy report, which will provide the following:

- A high-level long-term overview of how capital expenditure, capital financing and treasury management activity contribute to the provision of services
- An overview of how the associated risk is managed
- The implications for future financial sustainability

The aim of this capital strategy is to ensure that members of the Governance and Audit Committee understand the overall long-term policy objectives and resulting capital investment strategy requirements, governance procedures and risk appetite.

This capital investment strategy is reported separately from the Treasury Management Strategy Statement; non-treasury investments will be reported through the former. This ensures the separation of the core treasury function under security, liquidity and yield principles, and the policy and commercialism investments usually driven by expenditure on an asset. The capital investment strategy shows:

- The corporate governance arrangements for these types of activities.
- Any service objectives relating to the investments.
- The expected income, costs and resulting contribution.
- The debt related to the activity and the associated interest costs.
- The payback period (MRP policy).
- For non-loan type investments, the cost against the current market value.
- The risks associated with each activity.

Where a physical asset is being bought, details of market research, advisers used, (and their monitoring), ongoing costs and investment requirements and any credit information will be disclosed, including the ability to sell the asset and realise the investment cash.

Where the Council has borrowed to fund any non-treasury investment, there should also be an explanation of why borrowing was required and why the DLUHC Investment Guidance and CIPFA Prudential Code have not been adhered to.

If any non-treasury investment sustains a loss during the final accounts and audit process, the strategy and revenue implications will be reported through the same procedure as the capital investment strategy.

To demonstrate the proportionality between the treasury operations and the non-treasury operation, high-level comparators are shown throughout this report.

### **1.2.2 Treasury Management Reporting**

The Council is required to receive and approve, as a minimum, three main reports each year, which incorporate a variety of policies, estimates and actuals.

**a) Prudential and treasury indicators and treasury strategy (this report)**

The first and most important report is forward looking and covers:

- The capital plans (including prudential indicators).
- A Minimum Revenue Provision (MRP) policy (how residual capital expenditure is charged to revenue over time).
- The Treasury Management Strategy (how the investments and borrowings are to be organised) including treasury indicators; and
- An Investment Strategy (the parameters on how investments are to be managed).

**b) A mid-year treasury management report** – This is primarily a progress report and will update members on the capital position, amending prudential indicators as necessary, and whether any policies require revision. In addition, the Corporate Policy and Resources Committee will receive quarterly update reports.

**c) An annual treasury report** – This is a backward-looking review document and provides details of a selection of actual prudential and treasury indicators and actual treasury operations compared to the estimates within the strategy.

### **Scrutiny**

The above reports are required to be adequately scrutinised before being recommended to the Council. This role is undertaken by the Governance and Audit Committee.

### **Quarterly Reports**

In addition to the three major reports detailed above, quarterly reports at the end of June and December are also required. As the Council's quarter one end is at the end of May then this represents the end of June report. These reports are included within the quarterly reports which are considered by the Corporate Policy and Resources committee.

### **1.3 Treasury Management Strategy for 2024/25**

The strategy for 2024/25 covers two main areas:

#### **Capital issues**

- The capital expenditure plans and the associated prudential indicators.
- The Asset Management Plan
- The Minimum Revenue Provision (MRP) policy.

#### **Treasury management issues**

- The current treasury position.
- Treasury indicators which limit the treasury risk and activities of the Council.
- Prospects for interest rates.
- The borrowing strategy.
- Policy on borrowing in advance of need.
- Debt rescheduling.
- The investment strategy.
- Creditworthiness policy; and
- The policy on use of external service providers.

These elements cover the requirements of the Local Government Act 2003, the CIPFA Prudential Code, DLUHC MRP Guidance, the CIPFA Treasury Management Code and DLUHC Investment Guidance.

### **1.4 Training**

The CIPFA Code requires the responsible officer to ensure that members with responsibility for treasury management receive adequate training in treasury management. This especially applies to members responsible for scrutiny. This is mandatory training for the Governance and Audit Committee and is delivered annually. This training was undertaken on 23<sup>rd</sup> January 2024. Further training will be arranged as required. The training needs of treasury management officers are periodically reviewed.

### **1.5 Treasury Management Consultants**

The Council uses Link Treasury Services as its external treasury management advisors.

The Council recognises that responsibility for treasury management decisions remains with the organisation at all times and will ensure that undue reliance is not placed upon our external service providers. All decisions will be undertaken with regards to all available information, including, but not solely, our treasury advisers.

It also recognises that there is value in employing external providers of treasury management services in order to acquire access to specialist skills and

resources. The Council will ensure that the terms of their appointment and the methods by which their value will be assessed are properly agreed and documented and subjected to regular review.

The scope of investments within the Council's operations now includes both conventional treasury investments, (the placing of residual cash from the Council's functions), and more commercial type investments, such as investment properties. The commercial type investments require specialist advisers, and the Council currently uses Cushman and Wakefield in relation to this activity.

## 2. THE CAPITAL PRUDENTIAL INDICATORS 2024/25 – 2026/27

The Council's capital expenditure plans are the key driver of treasury management activity. The output of the capital expenditure plans is reflected in the prudential indicators, which are designed to assist members' overview and confirm capital expenditure plans.

### 2.1 Capital Expenditure and Financing

This prudential indicator is a summary of the Council's capital expenditure plans which are included in the approved Capital Programme, and which are the key drivers to treasury management activity. The output of the programme is reflected in the Council's prudential indicators, which are designed to provide Members with an overview and Members are asked to approve the capital expenditure forecasts:

<b>Capital Expenditure By Cluster £m</b>	<b>2022/23 Actual</b>	<b>2023/24 Estimate</b>	<b>2024/25 Estimate</b>	<b>2025/26 Estimate</b>	<b>2026/27 Estimate</b>
<b>Our People</b>	1.823	4.215	10.802	0.675	0.675
<b>Our Place</b>	2.924	6.668	19.114	0.634	0.050
<b>Our Council</b>	0.104	0.726	0.800	0.292	0.099
<b>Total</b>	<b>4.851</b>	<b>11.609</b>	<b>30.716</b>	<b>1.601</b>	<b>0.824</b>

Capital expenditure can be financed from a range of external and internal sources. External sources include private sector contributions i.e., S106 developer agreements, as well as government grants. Internal sources include capital receipts, earmarked reserves, and revenue contributions.

The table below summarises the above capital expenditure plans and how these plans are being financed by capital or revenue resources. Any shortfall of resources results in a funding borrowing need.

<b>Financing of capital expenditure £m</b>	<b>2022/23 Actual</b>	<b>2023/24 Estimate</b>	<b>2024/25 Estimate</b>	<b>2025/26 Estimate</b>	<b>2026/27 Estimate</b>
Capital receipts	0.523	0.614	0.450	0.000	0.000
External Grants	2.989	8.820	19.526	0.675	0.675
S106	0.328	1.651	1.204	0.000	0.000
Earmarked Reserves	0.000	1.232	9.393	0.926	0.149
Revenue Resources	0.955	0.005	0.000	0.000	0.000
<b>Net borrowing need for the year</b>	<b>0.056</b>	<b>-0.713</b>	<b>0.143</b>	<b>0.000</b>	<b>0.000</b>
<b>Total Financing</b>	<b>4.851</b>	<b>11.609</b>	<b>30.716</b>	<b>1.601</b>	<b>0.824</b>

Other long-term liabilities - The above financing need excludes other long-term liabilities, such as leasing arrangements which already include borrowing instruments.

The forecast of Revenue and Capital Reserves after taking into account contributions to and from these reserves for both capital and revenue purposes are detailed in the table below.

<b>Year End Resources £m</b>	<b>2022/23 Actual</b>	<b>2023/24 Estimate</b>	<b>2024/25 Estimate</b>	<b>2025/26 Estimate</b>	<b>2026/27 Estimate</b>
General Fund Balance	4.682	2.727	2.674	2.553	2.433
Earmarked Reserves	19.340	19.462	11.344	10.846	11.398
<b>Total Revenue Reserves</b>	<b>24.022</b>	<b>22.189</b>	<b>14.018</b>	<b>13.399</b>	<b>13.831</b>
Capital receipts	1.117	1.758	6.188	6.309	6.436
Capital Grants Unapplied	3.018	3.920	3.319	2.220	2.000
<b>Total Capital Reserves</b>	<b>4.135</b>	<b>5.678</b>	<b>9.507</b>	<b>8.509</b>	<b>8.436</b>
<b>Total Useable Reserves</b>	<b>28.157</b>	<b>27.867</b>	<b>23.525</b>	<b>21.908</b>	<b>22.267</b>

## 2.2 The Council's Borrowing Need (The Capital Financing Requirement)

The second prudential indicator is the Council's Capital Financing Requirement (CFR). The CFR is simply the total historic outstanding capital expenditure which has not yet been paid for from either revenue or capital resources. It is essentially a measure of the Council's indebtedness and so it's underlying borrowing need. Any capital expenditure above, which has not immediately been paid for through a revenue or capital resource, will increase the CFR.

The CFR does not increase indefinitely, as the minimum revenue provision (MRP) is a statutory annual revenue charge which broadly reduces the indebtedness in line with each asset's life, and so charges the economic consumption of capital assets as they are used.

The CFR includes any other long-term liabilities (e.g., finance leases). Whilst these increase the CFR, and therefore the Council's borrowing requirement, these types of schemes include a borrowing facility by the lease provider and so the Council is not required to separately borrow for these schemes. The Council is asked to approve the CFR projections below:

£m	2022/23 Actual	2023/24 Estimate	2024/25 Estimate	2025/26 Estimate	2026/27 Estimate
<b>Capital Financing Requirement</b>					
<b>Accounting Adj.</b>	1.065	1.065	1.065	1.065	1.065
<b>Finance Leases</b>	0.210	0.155	0.097	0.038	0.019
<b>Prudential Borrowing</b>	38.162	35.986	35.177	34.192	33.207
<b>Total CFR</b>	<b>39.437</b>	<b>37.206</b>	<b>36.339</b>	<b>35.295</b>	<b>34.292</b>
Of which: Commercial Investment Property	20.211	19.537	19.099	18.661	18.224
<b>Movement in CFR</b>	<b>-0.858</b>	<b>-2.231</b>	<b>-0.866</b>	<b>-1.044</b>	<b>-1.004</b>

<b>Movement in CFR represented by</b>					
Net borrowing need for the year (above)	0.056	-0.713	0.143	0.000	0.000
Less Net Lease Movements	0.000	-0.155	-0.097	-0.039	-0.019
Less MRP and other financing movements	-0.906	-1.314	-0.897	-0.991	-0.970
Capital Receipts from Loan Principal repaid	-0.008	-0.500	-0.015	-0.015	-0.015

<b>Movement in CFR</b>	<b>-0.858</b>	<b>-2.231</b>	<b>-0.866</b>	<b>-1.044</b>	<b>-1.044</b>
------------------------	---------------	---------------	---------------	---------------	---------------

A key aspect of the regulatory and professional guidance is that elected members are aware of the size and scope of any commercial activity in relation to the authority's overall financial position. The capital expenditure figures shown in 2.1 and the details above demonstrate the scope of this activity and, by approving these figures, consider the scale proportionate to the Authority's remaining activity.

### 3. BORROWING

The capital expenditure plans set out in Section 2 provide details of the service activity of the Council. The treasury management function ensures that the Council's cash is organised in accordance with the relevant professional codes, so that sufficient cash is available to meet this service activity and the Council's capital strategy. This will involve both the organisation of the cash flow and, where capital plans require, the organisation of appropriate borrowing facilities. The strategy covers the relevant treasury / prudential indicators, the current and projected debt positions and the annual investment strategy.

#### 3.1 Core Funds and Expected Investment Balances

The application of resources (capital receipts, reserves etc.) to either finance capital expenditure or other budget decisions to support the revenue budget will have an ongoing impact on investments unless resources are supplemented each year from new sources (asset sales etc.). Detailed below are estimates of the year-end balances for each resource and anticipated day-to-day cash flow balances.

<b>Year End Resources</b>	<b>2022/23</b>	<b>2023/24</b>	<b>2024/25</b>	<b>2025/26</b>	<b>2026/27</b>
<b>£m</b>	<b>Actual</b>	<b>Estimate</b>	<b>Estimate</b>	<b>Estimate</b>	<b>Estimate</b>
CFR	39.437	37.206	36.339	35.295	34.292
Less Leases	0.000	-0.155	-0.097	-0.038	-0.019
<b>Borrowing CFR</b>	<b>39.437</b>	<b>37.051</b>	<b>36.242</b>	<b>35.257</b>	<b>34.272</b>
Less Borrowing	21.500	19.000	18.750	18.750	17.750
<b>Over (-)/Under Borrowing</b>	<b>17.937</b>	<b>18.051</b>	<b>17.492</b>	<b>16.507</b>	<b>16.522</b>
General Fund Balance	-4.682	-2.727	-2.674	-2.553	-2.433
Earmarked Reserves	-19.340	-19.462	-11.344	-10.846	-11.398
Capital receipts	-1.117	-1.758	-6.188	-6.309	-6.436
Capital Grants Unapplied	-3.018	-3.920	-3.319	-2.200	-2.000
Provisions	-0.691	-0.600	-0.600	-0.600	-0.600

Working capital*	-7.604	-5.000	-5.000	-5.000	-5.000
<b>TOTAL FUND</b>	<b>-36.452</b>	<b>-33.467</b>	<b>-29.125</b>	<b>-27.508</b>	<b>-27.867</b>
<b>Expected investments (-) /Borrowing</b>	<b>-18.515</b>	<b>-15.416</b>	<b>-11.633</b>	<b>-11.001</b>	<b>-11.345</b>

\*Working capital balances shown are estimated year-end; these may be higher mid-year

### 3.2 Current Portfolio Position

The Council's forward projections for borrowing are summarised below. The table shows the actual external debt (the treasury management operations), against the underlying capital borrowing need (the Capital Financing Requirement - CFR), and internal borrowing as a percentage of the CFR.

£m	2022/23 Actual	2023/24 Estimate	2024/25 Estimate	2025/26 Estimate	2026/27 Estimate
<b>External Debt</b>					
Debt on 1 April	-21.500	-21.500	-19.000	-18.750	-18.750
Finance Lease	0	-0.155	-0.097	-0.038	-0.019
Expected change in Debt	0	2.500	0.250	0	1.000
<b>Gross external debt on 31 March</b>	<b>-21.500</b>	<b>-19.155</b>	<b>-18.847</b>	<b>-18.788</b>	<b>-17.769</b>
Internal Borrowing (on 31 March)	-17.937	-18.051	-17.492	-16.507	-16.522
<b>The Capital Financing Requirement</b>	<b>-39.437</b>	<b>-37.206</b>	<b>-36.339</b>	<b>-35.295</b>	<b>-34.292</b>
<b>Internal Borrowing %</b>	45%	49%	48%	47%	48%

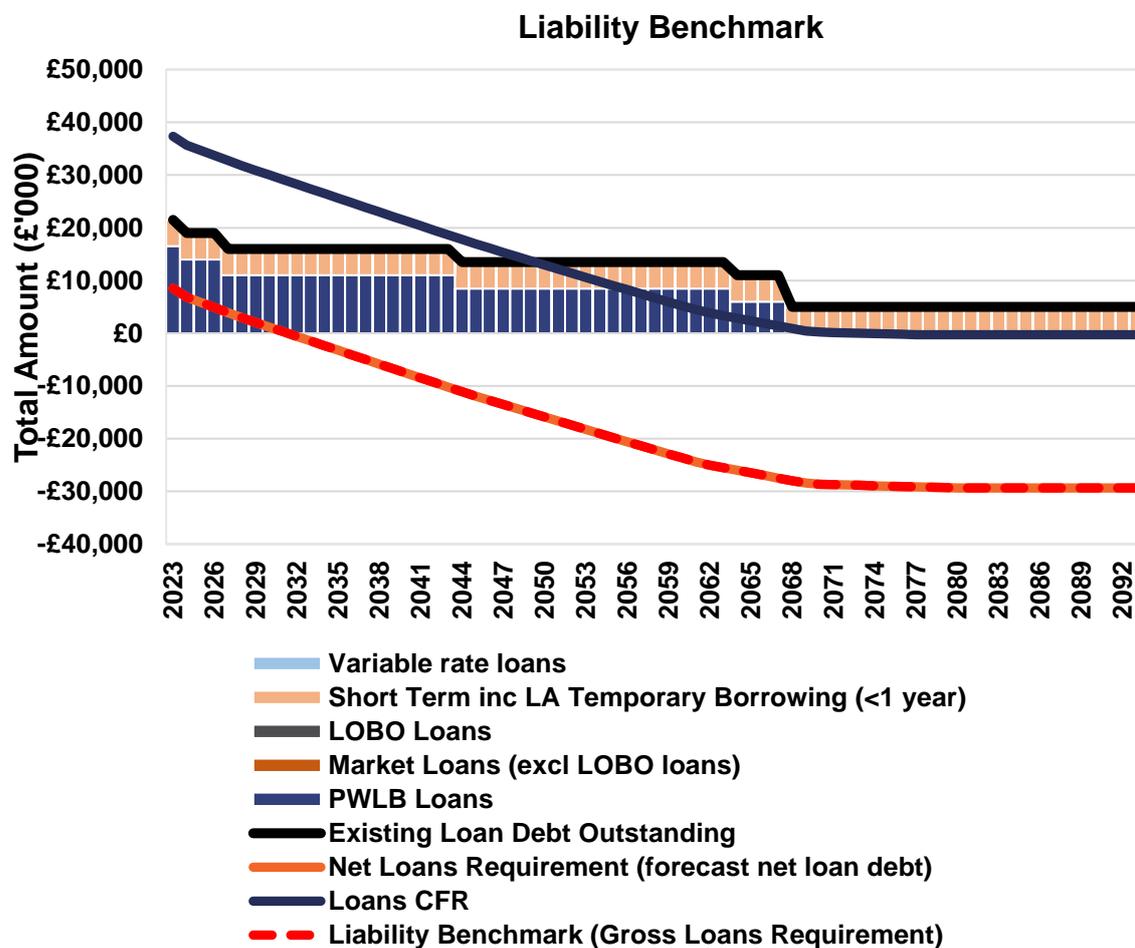

Within the range of prudential indicators there are a number of key indicators to ensure that the Council operates its activities within well-defined limits. One of these is that the Council needs to ensure that its gross debt does not, except in the short term, exceed the total of the CFR in the preceding year plus the estimates of any additional CFR for 2024/25 and the following two financial years. This allows some flexibility for limited early borrowing for future years but ensures that borrowing is not undertaken for revenue or speculative purposes.

The Director of Corporate Services (S151 Officer) reports that the Council complied with this prudential indicator in the current year and does not envisage difficulties for the future. This view takes into account current commitments, existing plans, and the proposals in this budget report.

### 3.3 Liability Benchmark

The Authority is required to estimate and measure the Liability Benchmark (LB) for the forthcoming financial year and the following two financial years as a minimum. This has been produced to show the full debt maturity profile of the Council. There are four main components of the liability benchmark as follows:

1. Existing loan debt outstanding: the Authority's existing loans that are still outstanding in future years.
2. Loans CFR: this is calculated in accordance with the loans CFR definition in the Prudential Code and projected into the future based on approved prudential borrowing and planned MRP.
3. Net loans requirement: this will show the Authority's gross loan debt less treasury management investments at the last financial year-end, projected into the future and based on its approved prudential borrowing, planned MRP and any other major cash flows forecast.
4. Liability benchmark (or gross loans requirement): this equals net loans requirement plus short-term liquidity allowance.

### 3.4 Treasury Indicators: Limits to Borrowing Activity

**The operational boundary.** This is the limit beyond which external debt is not normally expected to be exceeded. In most cases, this would be a similar figure to the CFR, but may be lower or higher depending on the levels of actual debt and the ability to fund under-borrowing by other cash resources.

Operational boundary £m	2023/24 Estimate	2024/25 Estimate	2025/26 Estimate	2026/27 Estimate
External Debt	21.500	19.155	18.847	18.788
<b>Operational Boundary</b>	<b>26.500</b>	<b>24.155</b>	<b>23.847</b>	<b>23.788</b>

**The authorised limit for external debt.** A further key prudential indicator represents a control on the maximum level of borrowing. This represents a limit beyond which external debt is prohibited, and this limit needs to be set or revised by the full Council. It reflects the level of external debt which, while not desired, could be afforded in the short term, but is not sustainable in the longer term.

1. This is the statutory limit determined under section 3 (1) of the Local Government Act 2003. The Government retains an option to control either the total of all councils' plans, or those of a specific council, although this power has not yet been exercised.
2. The Council is asked to approve the following authorised limit:

Authorised limit £m	2023/24 Estimate	2024/25 Estimate	2025/26 Estimate	2026/27 Estimate
Gross Debt	21.500	19.155	18.847	18.788
<b>Authorised Limit*</b>	<b>31.500</b>	<b>29.155</b>	<b>28.847</b>	<b>28.788</b>

\*The Authorised limit allows for external borrowing in advance of need for up to a maximum of two years and includes additional headroom for unexpected cashflow movements.

### 3.5 Prospects for Interest Rates

The Council has appointed Link Group as its treasury advisor and part of their service is to assist the Council to formulate a view on interest rates. Link provided the following forecasts on 8<sup>th</sup> January 2024. These are forecasts for certainty rates (gilt yields plus 80 bps).

Link Group Interest Rate View	08.01.24													
	Mar-24	Jun-24	Sep-24	Dec-24	Mar-25	Jun-25	Sep-25	Dec-25	Mar-26	Jun-26	Sep-26	Dec-26	Mar-27

50 yr PWLB	5.00	4.90	4.70	4.60	4.40	4.20	4.10	4.00	4.00	3.90	3.90	3.90	3.90	3.90

(A more detailed interest rate forecast, and economic commentary are set out in appendices B and C)

- The central forecast for interest rates was previously updated on 7<sup>th</sup> November and reflected a view that the MPC would be keen to underpin its anti-inflation credentials by keeping Bank Rate at 5.25% until at least H2 2024. It is expected rate cuts to start when both the CPI inflation and wage/employment data are unequivocally supportive of such a move, and that there is a strong likelihood of the overall economy enduring tepid growth (at best) or a mild recession (at worst) over the coming months.
- Naturally, timing on this matter will remain one of fine judgment: cut too soon, and inflationary pressures may well build up further; cut too late and any downturn or recession may be prolonged.
- In the upcoming months, forecasts will be guided not only by economic data releases and clarifications from the MPC over its monetary policies and the Government over its fiscal policies, but also international factors such as policy development in the US and Europe, the provision of fresh support packages to support the faltering recovery in China as well as the on-going conflict between Russia and Ukraine, and Gaza and Israel.
- On the positive side, consumers are still anticipated to be sitting on some excess savings left over from the pandemic, which could cushion some of the impact of the above challenges and may be the reason why the economy is performing a little better at this stage of the economic cycle than may have been expected. Nonetheless, with approximately 400,000 households per quarter facing a mortgage interest reset at higher levels than their current rate, the economy will face on-going headwinds from that source, in addition to lower income households having to spend disproportionately on essentials such as food, energy and rent payments.

## PWLB RATES

- Gilt yields have endured a volatile nine months with yields rising significantly on the back of inflation concerns before retracing much of those increases in November and December. With the market now anticipating rate cuts by H2 2024, the short and medium parts of the curve are now close to where they started 2023/24, but the longer part of the curve is still a little higher. At the time of writing there is c50 basis points difference between the 5 and 50 year parts of the curve.

### **The balance of risks to the UK economy: -**

- The overall balance of risks to economic growth in the UK is to the downside.

### **Downside risks to current forecasts for UK gilt yields and PWLB rates include: -**

- **Labour and supply shortages** prove more enduring and disruptive and depress economic activity (accepting that in the near-term this is also an upside risk to inflation and, thus, could keep gilt yields high for longer).
- **The Bank of England** has increased Bank Rate too fast and too far over recent months, and subsequently brings about a deeper and longer UK recession than we currently anticipate.
- **UK / EU trade arrangements** – if there was a major impact on trade flows and financial services due to complications or lack of co-operation in sorting out significant remaining issues.
- **Geopolitical risks**, for example in Ukraine/Russia, the Middle East, China/Taiwan/US, Iran and North Korea, which could lead to increasing safe-haven flows.

### **Upside risks to current forecasts for UK gilt yields and PWLB rates: -**

- Despite the recent tightening to 5.25%, the **Bank of England proves too timid** in its pace and strength of increases in Bank Rate and, therefore, allows inflationary pressures to remain elevated for a longer period within the UK economy, which then necessitates Bank Rate staying higher for longer than we currently project.
- **The pound weakens** because of a lack of confidence in the UK Government's pre-election fiscal policies, resulting in investors pricing in a risk premium for holding UK sovereign debt.
- Longer-term **US treasury yields** rise strongly if inflation remains more stubborn there than the market currently anticipates, consequently pulling gilt yields up higher.
- Projected **gilt issuance, inclusive of natural maturities and Quantitative Tightening (QT)**, could be too much for the markets to comfortably digest without higher yields compensating.

## **3.6 Borrowing Strategy**

The Borrowing Strategy covers the relevant prudential and treasury indicators, and the current and projected debt positions as detailed above.

The key objectives of the Council's Borrowing Strategy are;

- To ensure that future external debt is affordable and sustainable within the long term within the revenue budget constraints.
- To support schemes with a socio-economic value i.e. for the regeneration and growth of the District.
- To support significant service investment where the cost of borrowing will be offset by efficiencies and/or cost savings
- All external debt undertaken will be repaid on loan maturities

The Council is currently maintaining an under-borrowed position. This means that the capital borrowing need (the Capital Financing Requirement), has not been fully funded with external loan debt as cash supporting the Council's reserves, balances and cash flow has been used as a temporary measure.

This strategy is prudent as investment returns can vary and counterparty risk is still an issue that needs to be considered.

Against this background and the risks within the economic forecast, caution will be adopted with the 2024/25 treasury operations. The Director of Corporate Services (S151 Officer) will monitor interest rates in financial markets and adopt a pragmatic approach to changing circumstances:

- *if it was felt that there was a significant risk of a sharp FALL in long- and short-term rates, (e.g., due to a marked increase of risks around relapse into recession or of risks of deflation), then long term borrowings will be postponed, and potential rescheduling from fixed rate funding into short term borrowing will be considered.*
- *if it was felt that there was a significant risk of a much sharper RISE in borrowing rates than that currently forecast, perhaps arising from an acceleration in the rate of increase in central rates in the USA and UK, an increase in world economic activity, or a sudden increase in inflation risks, then the portfolio position will be re-appraised. Most likely, fixed rate funding will be drawn whilst interest rates are lower than they are projected to be in the next few years.*

Any decisions will be reported to the appropriate decision-making body at the next available opportunity.

### **3.7 Policy on Borrowing in Advance of Need**

The Council will not borrow more than or in advance of its needs purely in order to profit from the investment of the extra sums borrowed. Any decision to borrow in advance will be within forward approved Capital Financing Requirement estimates and will be considered carefully to ensure that value for money can be demonstrated and that the Council can ensure the security of such funds.

Risks associated with any borrowing in advance activity will be subject to prior appraisal and subsequent reporting through the mid-year or annual reporting mechanism.

### 3.8 Debt Rescheduling

Rescheduling of current borrowing in our debt portfolio could occur as there are upfront redemption discounts available but this would mean current loans on low interest rates may need to be replaced with loans on a substantially higher rate.

However, if rescheduling was done, it will be reported to the Council, at the earliest meeting following its action.

### 3.9 New Financial Institutions as a Source of Borrowing

In addition to borrowing from the PWLB, consideration will be given to sourcing funding at cheaper rates from the following:

- Local authorities (primarily shorter dated maturities)
- Financial institutions (primarily insurance companies and pension funds but also some banks, out of forward dates where the objective is to avoid a “cost of carry” or to achieve refinancing certainty over the next few years)
- Municipal Bonds Agency

Our advisors will keep us informed as to the relative merits of each of these alternative funding sources.

### 3.10 Approved sources of Long- and Short-Term Borrowing

## ANNUAL INVESTMENT STRATEGY

### 4.1 Investment Policy – Management of Risk

The Department of Levelling Up, Housing and Communities (DLUHC – formerly the Ministry of Housing, Communities and Local Government (MHCLG)) and CIPFA have extended the meaning of ‘investments’ to include both financial and non-financial investments. This report deals solely with financial investments, (as managed by the treasury management team). Non-financial investments, essentially the purchase of income yielding assets, are covered in the Capital Strategy.

The Council’s investment policy has regard to the following:

- DLUHC’s Guidance on Local Government Investments (“the Guidance”)
- CIPFA Treasury Management in Public Services Code of Practice and Cross Sectoral Guidance Notes 2021 (“the Code”).
- CIPFA Treasury Management Guidance Notes 2021

The Council’s investment priorities will be security first, liquidity second, then yield (return). The Council will aim to achieve the optimum return (yield) on its investments commensurate with proper levels of security and liquidity and with the Council’s risk appetite.

In the current economic climate, it is considered appropriate to maintain a degree of liquidity to cover cash flow needs but to also consider ‘laddering’ investments for periods up to 12 months with high credit rated financial institutions, whilst investment rates remain elevated.

The above guidance from the DLUHC and CIPFA places a high priority on the management of risk. This authority has adopted a prudent approach to managing risk and defines its risk appetite by the following means: -

1. Minimum acceptable **credit criteria** are applied in order to generate a list of highly creditworthy counterparties. This also enables diversification and thus avoidance of concentration risk. The key ratings used to monitor counterparties are the short term and long-term ratings.
2. **Other information:** ratings will not be the sole determinant of the quality of an institution; it is important to continually assess and monitor the financial sector on both a micro and macro basis and in relation to the economic and political environments in which institutions operate. The assessment will also take account of information that reflects the opinion of the markets. To achieve this consideration the Council will engage with its advisors to maintain a monitor on market pricing such as “**credit default swaps**” and overlay that information on top of the credit ratings.
3. **Other information sources** used will include the financial press, share price and other such information pertaining to the financial sector in order to establish the most robust scrutiny process on the suitability of potential investment counterparties.

4. This authority has defined the list of **types of investment instruments** that the treasury management team are authorised to use. There are two lists in Appendix D under the categories of 'specified' and 'non-specified' investments.
  - **Specified investments** are those with a high level of credit quality and subject to a maturity limit of one year or have less than a year left to run to maturity if originally, they were originally classified as being non-specified investments solely due to the maturity period exceeding one year.
  - **Non-specified investments** are those with less high credit quality, may be for periods in excess of one year, and/or are more complex instruments which require greater consideration by members and officers before being authorised for use.
5. **Non-specified and loan investment limits.** The Council has determined that it will set a limit to the maximum exposure of the total treasury management investment portfolio to non-specified treasury management investments of 40%.
6. **Lending limits**, (amounts and maturity), for each counterparty will be set through applying the matrix table in paragraph 4.2.
7. **Transaction limits** are set for each type of investment in 4.2.
8. This authority will set a limit for its investments which are invested for **longer than 365 days**, (see paragraph 4.4).
9. Investments will only be placed with counterparties from countries with a specified minimum **sovereign rating**, (see paragraph 4.3).
10. This authority has engaged **external consultants**, (see paragraph 1.5), to provide expert advice on how to optimise an appropriate balance of security, liquidity and yield, given the risk appetite of this authority in the context of the expected level of cash balances and need for liquidity throughout the year.
11. All investments will be denominated in **sterling**.
12. As a result of the change in accounting standards for 2023/24 under IFRS 9, the Authority will consider the implications of investment instruments which could result in an adverse movement in the value of the amount invested and resultant charges at the end of the year to the General Fund. (In November 2018, the MHCLG, concluded a consultation for a temporary override to allow English local authorities time to adjust their portfolio of all pooled investments by announcing a statutory override to delay implementation of IFRS 9 for five years ending 31.3.23. More recently, a further extension to the over-ride to 31.3.25 has been agreed by Government.

However, this authority will also pursue **value for money** in treasury management and will monitor the yield from investment income against appropriate benchmarks for investment performance, (see paragraph 4.5). Regular monitoring of investment performance will be carried out during the year.

## 4.2 Creditworthiness Policy

The primary principle governing the Council's investment criteria is the security of its investments, although the yield or return on the investment is also a key consideration. After this main principle, the Council will ensure that:

- It maintains a policy covering both the categories of investment types it will invest in, criteria for choosing investment counterparties with adequate security, and monitoring their security. This is set out in the specified and non-specified investment sections below; and
- It has sufficient liquidity in its investments. For this purpose, it will set out procedures for determining the maximum periods for which funds may prudently be committed. These procedures also apply to the Council's prudential indicators covering the maximum principal sums invested.

The Director of Corporate Services (S151 Officer) will maintain a counterparty list in compliance with the following criteria and will revise the criteria and submit them to Council for approval as necessary. These criteria are separate to that which determines which types of investment instrument are either specified or non-specified as it provides an overall pool of counterparties considered high quality which the Council may use, rather than defining what types of investment instruments are to be used.

Credit rating information is supplied by the Link Group, our treasury advisors, on all active counterparties that comply with the criteria below. Any counterparty failing to meet the criteria would be omitted from the counterparty (dealing) list. Any rating changes, rating Watches (notification of a likely change), rating Outlooks (notification of the longer-term bias outside the central rating view) are provided to officers almost immediately after they occur, and this information is considered before dealing. For instance, a negative rating Watch applying to counterparty at the minimum Council criteria will be suspended from use, with all others being reviewed in light of market conditions.

The criteria for providing a pool of high-quality investment counterparties, (both specified and non-specified investments) is:

- Banks 1 - good credit quality – the Council will only use banks which:
  - i. are UK banks; and/or
  - ii. are non-UK and domiciled in a country which has a minimum sovereign Long-Term rating of AAand have, as a minimum, the following Fitch, Moody's and Standard & Poor's credit ratings (where rated):

- i. Short Term – F1
- ii. Long Term – A
- Banks 2 – Part nationalised UK bank – Royal Bank of Scotland ring-fenced operations. This bank can be included provided they continue to be part nationalised or meet the ratings in Banks 1 above.
- Banks 3 – The Council’s own banker for transactional purposes if the bank falls below the above criteria, although in this case balances will be minimised in both monetary size and time invested.
- Bank subsidiary and treasury operation -. The Council will use these where the parent bank has provided an appropriate guarantee or has the necessary ratings outlined above.
- Building societies - The Council will use all societies which meet the ratings for banks outlined above.
- Money Market Funds (MMFs) CNAV – AAA
- Money Market Funds (MMFs standard) LNVAV – AAA
- Money Market Funds (MMFs enhanced) VNAV – AAA
- UK Government (including gilts, Treasury Bills and the DMADF)
- Local authorities, parish councils etc.
- Housing associations
- Supranational institutions
- Local Authority Property Asset Fund (CCLA)
- Local/Community Bonds
- Corporate Bond Funds
- Covered Bonds

**Use of additional information other than credit ratings.** Additional requirements under the Code require the Council to supplement credit rating information. Whilst the above criteria rely primarily on the application of credit ratings to provide a pool of appropriate counterparties for officers to use, additional operational market information will be applied before making any specific investment decision from the agreed pool of counterparties. This additional market information (for example Credit Default Swaps, rating Watches/Outlooks) will be applied to compare the relative security of differing investment opportunities.

**Time and monetary limits applying to investments.** The time and monetary limits for institutions on the Council’s counterparty list are as follows (these will cover both specified and non-specified investments). It should be noted that in the case of Lloyds Bank, our current bankers, that as well as allowing £7.5m fixed term investment in that one institution that there is flexibility to hold, in current account balances at Lloyds Bank, up to £2m ‘cash’ on any one day:

	Fitch	Moody's	Standard & Poors	Money Limit	Time Limit
Banks 1 – up to 1 year	F1	P1	A1	£7.5m per counterparty at Group level	1 year
Banks 1 – over 1 year	AA	Aa2	AA	£2m maximum exposure	1 year to 5 years
Banks 2 – UK part nationalised				£5m per counterparty at Group Level	1 year
Banks 3 – Council's own bank if not covered by 1 or 2				£1m	1 Day
Other Local Authorities				£5m per counterparty	5 years
Housing Associations				£1m maximum exposure	6 mths
Bank of England DMADF				No limit	6 mths
Gilts/Treasury Bills – where no loss of principal if held to maturity				£5m maximum exposure	5 years
Supranational				£5m per counterparty	1 year
Quality Corporate Bonds Funds				£2m	5 years
Local Authority Property Asset Funds				£4m	5 years
Certificates of Deposit				£2m	5 years
Covered Bonds				£1m	5 years

	Fund rating			Money and/or % Limit	Time Limit
Money market funds CNAV	AAA			£7.5m per counterparty	Overnight
Money market funds LVNAV (standard)	AAA			£7.5m per counterparty	Overnight
Money market funds VNAV (Enhanced)	AAA			£5m	5 years

### 4.3 Other Limits

Due care will be taken to consider the exposure of the Council's total investment portfolio to non-specified investments, countries, groups and sectors.

- a) **Non-specified treasury management investment limit.** The Council has determined that it will limit the maximum total exposure of treasury management investments to non-specified treasury management investments as being 40% of the total treasury management investment portfolio.
- b) **Country limit.** The Council has determined that it will only use approved counterparties from countries with a minimum sovereign credit rating of AA- from Fitch. The list of countries that qualify using this credit criteria as at the date of this report are shown in Appendix E. This list will be added to, or deducted from, by officers should ratings change in accordance with this policy.
- c) Other limits. In addition:
  - No more than £2m will be placed with any non-UK country at any time.
  - Limits in place above will apply to a group of companies.
  - Sector limits will be monitored regularly for appropriateness

### 4.4 Investment Strategy

**In-house funds.** Investments will be made with reference to the core balance and cash flow requirements and the outlook for short-term interest rates (i.e., rates for investments up to 12 months). Greater returns are usually obtainable by investing periods. While most cash balances are required in order to manage the ups and downs of cash flow, where cash sums can be identified that could be invested for longer periods, the value to be obtained from longer term investments will be carefully assessed.

- If it is thought that Bank Rate is likely to rise significantly within the time horizon being considered, then consideration will be given to keeping most investments as being short term or variable.

- Conversely, if it is thought that Bank Rate is likely to fall within that time period, consideration will be given to locking in higher rates currently obtainable, for longer periods.

**Investment Returns Expectations.**

The current forecast shown in paragraph 3.5, includes a forecast for Bank Rate to have peaked at 5.25%.

The suggested budgeted investment earnings rates for returns on investments placed for periods up to about three months during each financial year are as follows: -

Average earnings in each year	
2024/25	5.00%
2025/26	3.44%
2026/27	3.00%
2027/28	3.00%
Years 6 to 10	3.00%
Years 10+	3.00%

Money market funds (MMFs), yields have now begun to rise across a number of market operators. This mirrors rises in the Bank Rate but because of continuing investor cash flow uncertainty, and the need to maintain liquidity in these unprecedented times, at a more modest rate.

**Ethical Investing**

The Council continues to develop its strategy in relation to Sustainability, Climate Change and Environment. As the Council will be interested in undertaking actions to reduce climate change, the Council as an ethical investor will consider the environmental, social and governance issues (ESG) when making treasury investment decisions.

Investments will be in accordance with counterparty and creditworthiness (as detailed at 4.2

**Treasury Investment Portfolio**

The Council is expecting to have an average investment portfolio of £13m throughout 2024/25 and expects to receive investment income totalling £0.651m as shown below:

Treasury Investment Portfolio	Average Portfolio £m	Interest Rate %	Interest £m
Liquidity Investments	10.00	5.00	0.500
Long Term Investments	3.00	5.03	0.151
<b>Total Investment Income (2024/2025)</b>	<b>13.00</b>	<b>5.015</b>	<b>0.651</b>

**Investment treasury indicator and limit** - total principal funds invested for greater than 365 days. These limits are set with regard to the Council's liquidity requirements and to reduce the need for early sale of an investment and are based on the availability of funds after each year-end.

The Council is asked to approve the treasury indicator and limit:

<b>Maximum principal sums invested &gt; 364 &amp; 365 days</b>			
£m	2024/25	2025/26	2026/27
Principal sums invested > 365 days	£5m	£5m	£5m

For its cash flow generated balances, the Council will seek to utilise its business reserve instant access and notice accounts, money market funds and short-dated deposits (overnight to 100 days) in order to benefit from the compounding of interest.

#### **4.5 Investment Risk Benchmarking**

These benchmarks are simple guides to maximum risk, so they may be breached from time to time, depending on movements in interest rates and counterparty criteria. The purpose of the benchmark is that officers will monitor the current and trend position and amend the operational strategy to manage risk as conditions change. Any breach of the benchmarks will be reported, with supporting reasons in the mid-year or Annual Report.

Security - The Council's maximum security risk benchmark for the current portfolio, when compared to these historic default tables, is:

- 0.06% historic risk of default when compared to the whole portfolio.

Liquidity – in respect of this area the Council seeks to maintain:

- Liquid short-term deposits of at least £4m available with a week's notice.
- Weighted average life benchmark is expected to be 0.25 years, with a maximum of 1 years.

Yield - local measures of yield benchmarks are.

- Investments – internal returns above the 7-day Sterling Overnight Index Average (SONIA) compounded rate

And in addition, that the security benchmark for each individual year is:

	1 year	2 years	3 years	4 years	5 years
<b>Maximum</b>	<b>0.07%</b>	<b>0.19%</b>	<b>0.36%</b>	<b>0.55%</b>	<b>0.77%</b>

Note: This benchmark is an average risk of default measure and would not constitute an expectation of loss against a particular investment.

#### **4.6 End of Year Investment Report**

At the end of the financial year, the Council will report on its investment activity as part of its Annual Treasury Report.

#### **4.7 Non-Treasury Investments (Commercial Property)**

The Council has invested £21.666m (£30m budget approved) in creating a Commercial Property Portfolio, to generate a revenue return to support the future sustainability of the Council and therefore protecting the services as government funding was reduced. The net return was estimated to be £600k p.a. based on the approved £20m investment limit. The first acquisition was made in October 2017. The Council's portfolio currently consists of 6 properties, with £20.500m having been spent on these acquisitions (excludes costs) to date and the gross return for 2023/24 is estimated to be 7.7%. After taking account of management and financing costs (including MRP) a return of around 5.5% is being achieved.

It is no longer anticipated that additional assets will be acquired. However, the portfolio will be managed within the current values and replacement properties acquired if existing properties are sold ensuring income levels are maintained.

The Council has a Commercial Contingency Budget of £0.172m to mitigate the risk of rental losses, and a Valuation Volatility Reserve to mitigate the risk of capital loss on disposal.

In addition, the Council has set aside £0.850m as a Valuation Volatility Reserve, this reflects 4% of the purchase price. However, now that MRP will be charged annually, thus reducing outstanding borrowing, the Reserve will be reduced over the Medium-Term Financial Plan.

#### **Strategy**

Working with the commercial property consultant, Cushman & Wakefield, officers have developed an investment strategy for the Council that aims to balance risk across the portfolio whilst achieving the target returns required.

However, any future additional property investments can no longer be funded from borrowing, and our own resources must be utilised to fund any

acquisitions. Currently there is no expectation that any additional properties will be acquired.

The strategy included.

1. To acquire an investment portfolio of commercial property assets in lot sizes of £1.0m to £10.0m, targeting an average lot size of circa £3.5m to £4m across the portfolio and total investment of £30.0m.
2. Authority to complete on acquisitions should be delegated to the Chief Executive in consultation with the Chief Finance Officer and Leader of the Council, provided that the purchase is within agreed criteria. All assets will be assessed against these criteria and the Chief Executive will have delegated Authority to complete on the acquisition of assets which score 50 or more out of 70. Any asset which falls below this threshold or registers a zero against any criteria may still be considered but specific justification will need to be provided and the decision to proceed taken to the Corporate Policy and Resources Committee for approval.
3. Reserves will be utilised to fund any further acquisitions. Business case modelling will be developed using an opportunity cost of capital based on debt funded through Prudential Borrowing. The business case will be made on the basis of borrowing the full amount each time to ensure that resources are able to be recycled.
4. All assets will be acquired against a target hold period of 5 to 10 years with consideration given to asset management to enhance/protect value over the period of ownership (and any additional resource required/expected in this respect) and risks relating to disposal after the proposed hold period. A proportion of the income will be allocated for risk provision. Further returns would depend on investment performance relative to target and might be achieved through release of the risk provision and/or capital returns.
5. The financial position will be thoroughly monitored throughout the hold period and adequate response made to any change in market conditions and portfolio performance. Decisions regarding the funding of acquisitions will be made by the Director of Corporate Services (Section151 Officer) and will be based on:
  - An analysis of disposal value risk after an assumed hold period
  - The expectation that the asset will generate a capital return that tracks inflation or better with a provision for risk should this not be achieved
6. Access to suitably qualified/experienced resource is essential for successful delivery and management of the risks involved. Resources should be identified and ring-fenced to the activity. The property and asset team has been restructured to ensure that sufficient resources available to manage the existing assets and the new additions that would be acquired in line with this strategy.

#### 4.8 Commercial Income as a Percentage of Net Revenue Expenditure

The Council receives income from investment properties which contribute towards achieving a balanced revenue budget. The table below shows the extent to which the expenditure planned to meet service delivery objectives is dependent on achieving income from these properties over the Medium-Term Financial Plan period.

%	2024/25 Estimate	2025/26 Estimate	2026/27 Estimate	2027/28 Estimate	2028/29 Estimate
<b>Net Revenue Expenditure £m</b>	17.303	17.705	18.207	18.766	19.058
<b>Commercial Income £m</b>	(1.568)	(1.567)	(1.606)	(1.695)	(1.717)
<b>Ratio</b>	<b>9.1%</b>	<b>9.3%</b>	<b>8.9%</b>	<b>8.9%</b>	<b>8.7%</b>

#### 4.9 Capital Investment Strategy

The Capital Investment Strategy forms a key part of the Council's overall Corporate Planning Framework. It provides a mechanism by which the Council's capital investment and financing decisions can be aligned with the Council's over-arching corporate priorities and objectives over a medium term (five year) planning horizon. The Strategy has direct links to the Treasury Management Strategy, and it is therefore appropriate that the Governance and Audit Committee scrutinise and provide assurance to Council on both policies. The Capital Investment Strategy is attached at Appendix H.

### 5 APPENDICES to the Treasury Management Strategy

- A Prudential and Treasury Indicators and MRP statement
- B Interest rate forecasts
- C Economic background
- D Treasury management practice 1 – credit and counterparty risk management
- E Approved countries for investments
- F Treasury management scheme of delegation
- G The treasury management role of the section 151 officer
- H The Capital Investment Strategy

## APPENDIX A

### THE CAPITAL PRUDENTIAL AND TREASURY INDICATORS 2023/24 – 2026/27 AND MRP STATEMENT

The Council's capital expenditure plans are the key driver of treasury management activity. The output of the capital expenditure plans is reflected in the prudential indicators, which are designed to assist members' overview and confirm capital expenditure plans

#### Capital Expenditure

Capital Expenditure By Cluster £m	2023/23 Actual	2023/24 Estimate	2024/25 Estimate	2025/26 Estimate	2026/27 Estimate
<b>Our People</b>	1.823	4.215	10.802	0.675	0.675
<b>Our Place</b>	2.924	6.668	19.114	0.634	0.050
<b>Our Council</b>	0.104	0.726	0.800	0.292	0.099
<b>Total</b>	<b>4.851</b>	<b>11.609</b>	<b>30.716</b>	<b>1.601</b>	<b>0.824</b>

#### Minimum Revenue Provision (MRP) Policy Statement

The Council is required to pay off an element of the accumulated General Fund capital spend funded from borrowing (the CFR) each year through a revenue charge (the minimum revenue provision - MRP), although it is also allowed to undertake additional voluntary payments if required (voluntary revenue provision - VRP).

DLUHC regulations have been issued which require the full Council to approve an MRP Statement in advance of each year. A variety of options are provided to councils, so long as there is a prudent provision. The Council is recommended to approve the following MRP Statement.

From 1 April 2008 for all unsupported borrowing (including PFI and finance leases) the MRP policy will be:

- **Asset life method** - MRP will be charged, and therefore debt repaid over the expected useful life of the asset financed from borrowing based on the estimated life of the assets, in accordance with the regulations (this option must be applied for any expenditure capitalised under a Capitalisation Direction) (option 3).

In applying the Asset Life Method MRP should normally follow the year after the expenditure has been incurred. However, in accordance with Statutory Guidance commencement of MRP may be deferred until the asset becomes operational.

The estimated useful life of assets will not exceed 50 years except as otherwise permitted by the guidance (and supported by valuer's advice).

If no useful life can be attributed to the asset, i.e., land, then the estimated useful life will be taken as 50 years

- **Asset life method – Annuity Method**  
Under this approach the debt is repaid over the expected useful life of the asset financed from borrowing. For, regeneration schemes or administrative projects, where revenue benefits are only realised in future years or increase in future years and will be based on an appropriate rate.
- **Loan Principals**  
For capital expenditure on loans to third parties where the principal element of the loan is being repaid in annual instalments, the capital receipts arising from the principal loan repayments will be used to reduce the CFR and then MRP will be calculated accordingly.
- **Borrowing for Non-Treasury Investments**  
Where the Council has previously borrowed for the acquisition of Commercial Investment Properties the Asset Life Method will be used to calculate the MRP charge applicable on an annual basis. The maximum life that should be used for calculating MRP on this class of assets is 50 years which is specified by government guidance.
- **Finance Leases**  
MRP for finance leases and service concessions will be charged over the primary period of the lease, in line with the guidance.
- **Voluntary MRP Overpayments** – The Council has the ability to repay additional amounts for MRP as voluntary contributions as it considers appropriate. A change introduced by the revised DLUHC MRP Guidance was the allowance that any charges made over the statutory minimum revenue provision (MRP), voluntary revenue provision or overpayments, can, if needed, be reclaimed in later years if deemed necessary or prudent. In order for these sums to be reclaimed for use in the budget, this policy must disclose the cumulative overpayment made each year. Up until 31 March 2023 the total VRP overpayments were £1,081k however, as there has been a change in our Policy to charge MRP on Commercial Investment assets, then this VRP will not be deemed an overpayment.

These options provide for a reduction in the borrowing need over approximately the asset's life.

## **Affordability Prudential Indicators**

The previous sections cover the overall capital and control of borrowing prudential indicators, but within this framework prudential indicators are required to assess the affordability of the capital investment plans. These provide an indication of the impact of the capital investment plans on the

Council's overall finances. The Council is asked to approve the following indicators:

**a. Ratio of Financing Costs to Net Revenue Stream**

This indicator identifies the trend in the cost of capital (borrowing and other long term obligation costs) against the net revenue stream.

%	2024/25	2025/26	2026/27	2027/28	2028/29
	Estimate	Estimate	Estimate	Estimate	Estimate
<b>Net Revenue Expenditure £m</b>	<b>17.303</b>	<b>17.705</b>	<b>18.207</b>	<b>18.766</b>	<b>19.058</b>
Interest Payable £m	0.693	0.654	0.643	0.744	0.744
MRP £m	0.959	0.985	0.985	0.932	0.910
<b>Capital Financing Charges</b>	<b>1.652</b>	<b>1.639</b>	<b>1.628</b>	<b>1.676</b>	<b>1.654</b>
<b>Ratio</b>	<b>9.5%</b>	<b>9.3%</b>	<b>8.9%</b>	<b>8.9%</b>	<b>8.7%</b>

The estimates of financing costs include current commitments and the proposals in this budget report.

**b. Incremental Impact of Capital Investment Decisions on Council Tax**

This indicator identifies the revenue costs associated with proposed changes to the five-year capital programme recommended in this budget report compared to the Council's existing approved commitments and current plans. The assumptions are based on the budget, but will invariably include some estimates, such as the level of Government support, which are not published over a three-year period.

New schemes funded from borrowing are expected to generate income/efficiencies to support the cost of borrowing therefore £0 impact on the Taxpayer.

Incremental impact of capital investment decisions on the band D council tax:

£	2024/25 Estimate	2025/26 Estimate	2026/27 Estimate	2024/25 Estimate	2028/29 Estimate
<b>Council tax - band D</b>	0	0	0	0	0

**Treasury Indicators for Debt**

There are three debt related treasury activity limits. The purpose of these is to restrain the activity of the treasury function within certain limits, thereby managing risk and reducing the impact of any adverse movement in interest

rates. However, if these are set to be too restrictive, they will impair the opportunities to reduce costs / improve performance. The indicators are:

- Upper limits on variable interest rate exposure. This identifies a maximum limit for variable interest rates based upon the debt position net of investments
- Upper limits on fixed interest rate exposure. This is similar to the previous indicator and covers a maximum limit on fixed interest rates.
- Maturity structure of borrowing. These gross limits are set to reduce the Council's exposure to large, fixed rate sums falling due for refinancing, and are required for upper and lower limits. The Council is asked to approve the following treasury indicators and limits:

£m	2024/25	2025/26	2026/27
<b>Interest rate exposures</b>			
	<b>Upper</b>	<b>Upper</b>	<b>Upper</b>
<b>Limits on fixed interest rates:</b>			
• Debt only	100%	100%	100%
• Investments only	75%	75%	75%
<b>Limits on variable interest rates</b>			
• Debt only	25%	25%	20%
• Investments only	100%	100%	100%
<b>Maturity structure of fixed interest rate borrowing 2024/25</b>			
	<b>Lower</b>	<b>Upper</b>	
Under 12 months	0%	100%	
12 months to 2 years	0%	100%

## APPENDIX C

### ECONOMIC BACKGROUND (as at December 2023)

#### 5.1 ECONOMIC BACKGROUND

- The third quarter of 2023/24 saw:
  - A 0.3% m/m decline in real GDP in October, potentially partly due to unseasonably wet weather, but also due to the ongoing drag from higher interest rates. Growth for the second quarter, ending 30<sup>th</sup> September, was revised downwards to -0.1% and growth on an annual basis was also revised downwards, to 0.3%;
  - A sharp fall in wage growth, with the headline 3myy rate declining from 8.0% in September to 7.2% in October, although the ONS “experimental” rate of unemployment has remained low at 4.2%;
  - CPI inflation continuing on its downward trajectory, from 8.7% in April to 4.6% in October, then again to 3.9% in November;
  - Core CPI inflation decreasing from April and May’s 31 years’ high of 7.1% to 5.1% in November, the lowest rate since January 2022;
  - The Bank of England holding rates at 5.25% in November and December;
  - A steady fall in 10-year gilt yields as investors revised their interest rate expectations lower.
- The revision of GDP data in Q2 to a 0.1% q/q fall may mean the mildest of mild recessions has begun. Indeed, real GDP in October fell 0.3% m/m which does suggest that the economy may stagnate again in Q3. The weakness in October may partly be due to the unseasonably wet weather. That said, as the weakness was broad based it may also be the case that the ongoing drag from higher interest rates is more than offsetting any boost from the rise in real wages.
- However, the rise in the flash composite activity Purchasing Managers Index, from 50.7 in November to 51.7 in December, did increase the chances of the economy avoiding a contraction in Q3. The improvement was entirely driven by the increase in the services activity balance from 50.9 to 52.7. (Scores above 50 point to expansion in the economy, although only tepid in this instance.) The press release noted that this was primarily driven by a revival in consumer demand in the technological and financial services sectors. This chimes with the further improvement in the GfK measure of consumer confidence in December, from -24 to -22. The services PMI is now consistent with non-retail services output growing by 0.5% q/q in Q3, but this is in stark contrast to the manufacturing sector where the output balance slumped from 49.2 to 45.9 and, at face value, the output balance is consistent with a 1.5% q/q fall in manufacturing output in Q3.
- The 0.3% m/m fall in retail sales volumes in October means that after contracting by 1.0% q/q (which was downwardly revised from -0.8% q/q) in

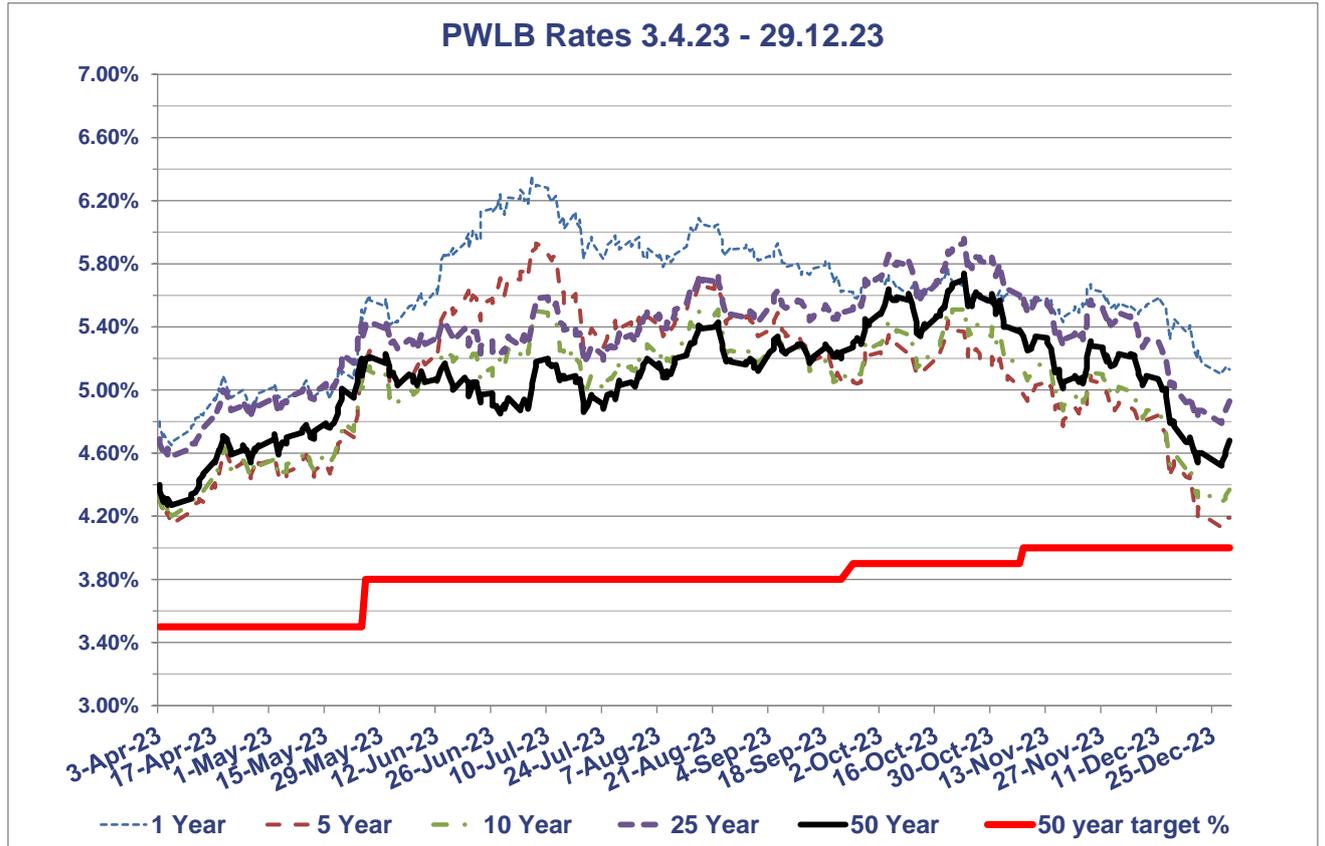

Q2, retail activity remained weak at the start of Q3. That suggests higher interest rates are taking a bigger toll on real consumer spending.

- Higher interest rates have filtered through the financial channels and weakened the housing market but, overall, it remains surprisingly resilient with only marginal falls showing year on year on the Halifax (-1%) and Nationwide (-1.8%) indices. However, the full weakness in real consumer spending and real business investment has yet to come as currently it is estimated that around two thirds to a half of the impact of higher interest rates on household interest payments has yet to be felt.
- Overall, we expect real GDP growth to remain subdued throughout 2024 as the drag from higher interest rates is protracted but a fading of the cost-of-living crisis and interest rate cuts in the second half of 2024 will support a recovery in GDP growth in 2025.
- The labour market remains tight by historical standards, but the sharp fall in wage growth seen in October will reinforce the growing belief in markets that interest rates will be cut mid-2024. Wage growth eased in October much faster than the consensus expected. Total earnings fell by 1.6% m/m, which meant the headline 3myy rate eased from 8.0% in September to 7.2% in October. This news will be welcomed by the Bank of England. Indeed, the timelier three-month annualised rate of average earnings growth fell from +2.4% to -1.2%. Excluding bonuses, it fell from 5.3% to 2.0%. Furthermore, one of the Bank's key barometers of inflation persistence, regular private sector pay growth, dropped from 7.9% 3myy to 7.3%, which leaves it comfortably on track to fall to 7.2% by December, as predicted by the Bank in November.
- The fall in wage growth occurred despite labour demand being stronger in October than expected. The three-month change in employment eased only a touch from +52,000 in September to +50,000 in October. But resilient labour demand was offset by a further 63,000 rise in the supply of workers in the three months to October. That meant labour supply exceeded its pre-pandemic level for the first time, and the unemployment rate remained at 4.2% in October. In the three months to November, the number of job vacancies fell for the 17<sup>th</sup> month in a row, from around 959,000 in October to around 949,000. That has reduced the vacancy to unemployment ratio as demand for labour eases relative to supply, which may support a further easing in wage growth in the coming months.
- CPI inflation fell from 6.7% in September to 4.6% in October, and then again to 3.9% in November. Both these falls were bigger than expected and there are clear signs of easing in domestic inflationary pressures. The fall in core CPI inflation from 5.7% to 5.1% in November was bigger than expected (consensus forecast 5.6%). That's the lowest rate since January 2022. Some of the decline in core inflation was due to the global influence of core goods inflation, which slowed from 4.3% to 3.3%. But some of it was due to services inflation falling from 6.6% to 6.3%. The Bank views the latter as a key barometer of the persistence of inflation and it came in further below the Bank's forecast of 6.9% in its November Monetary Policy Report. This will give the Bank more confidence that services inflation is now on a firmly downward path.

- The Bank of England sprung no surprises with its December monetary policy committee (MPC) meeting, leaving interest rates at 5.25% for the third time in a row and pushing back against the prospect of near-term interest rate cuts. The Bank continued to sound hawkish, with the MPC maintaining its tightening bias saying that “further tightening in monetary policy would be required if there were evidence of more persistent inflationary pressures”. And it stuck to the familiar script, saying that policy will be “sufficiently restrictive for sufficiently long” and that “monetary policy is likely to need to be restrictive for an extended period of time”. In other words, the message is that the MPC is not yet willing to endorse investors’ expectations that rates will be cut as soon as May 2024.
- Looking ahead, our colleagues at Capital Economics forecast that the recent downward trends in CPI and core inflation will stall over the next few months before starting to decline more decisively again in February. That explains why we think the Bank of England won’t feel comfortable cutting interest rates until H2 2024.
- The fall in UK market interest rate expectations in December has driven most of the decline in 10-year gilt yields, which have fallen in line with 10-year US Treasury and euro-zone yields. 10-year gilt yields have fallen from 4.68% in October 2023 to around 3.70% at the time of writing, with further declines likely if the falling inflation story is maintained.
- Investors’ growing expectations that the Fed will cut interest rates soon has led to an improvement in risk sentiment, which has boosted the pound and other risky assets. In addition, the rise in the pound, from \$1.21 in November to \$1.27 now, has also been supported by the recent relative decline in UK wholesale gas prices.
- The further fall in 10-year real gilt yields in December has supported the recent rise in the FTSE 100. That said, the index remains 5% below its record high in February. This modest rise in equities appears to have been mostly driven by strong performances in the industrials and rate-sensitive technology sectors. But UK equities have continued to underperform US and euro-zone equities. The FTSE 100 has risen by 2.2% in December, while the S&P 500 has risen by 3.8%. This is partly due to lower energy prices, which have been a relatively bigger drag on the FTSE 100, due to the index’s high concentration of energy companies.

In the chart below, the rise in gilt yields across the curve in the first half of 2023/24, and therein PWLB rates, is clear to see, prior to the end of year rally based on a mix of supportive domestic and international factors.

## PWLB RATES 3.4.23 - 29.12.23

## MPC meetings 2<sup>nd</sup> November and 14<sup>th</sup> December 2023

- On 2<sup>nd</sup> November, the Bank of England's Monetary Policy Committee (MPC) voted to keep Bank Rate on hold at 5.25%, and on 14<sup>th</sup> December reiterated that view. Both increases reflected a split vote, the latter by 6 votes to 3, with the minority grouping voting for an increase of 0.25% as concerns about "sticky" inflation remained in place.
- Nonetheless, with UK CPI inflation now at 3.9%, and core inflating beginning to moderate (5.1%), markets are voicing a view that rate cuts should begin in Q1 2024/25, some way ahead of the indications from MPC members. Of course, the data will be the ultimate determinant, so upcoming publications of employment, wages and inflation numbers will be of particular importance, and on-going volatility in Bank Rate expectations and the gilt yield curve can be expected.
- In addition, what happens outside of the UK is also critical to movement in gilt yields. The US FOMC has kept short-term rates in the range of 5.25%-5.50%, whilst the ECB has moved its Deposit rate to a probable peak of 4%. Markets currently expect both central banks to start cutting rates in 2024.

## APPENDIX D

### TREASURY MANAGEMENT PRACTICE (TMP1) – CREDIT AND COUNTERPARTY RISK MANAGEMENT

The DLUHC issued Investment Guidance in 2018, and this forms the structure of the Council's policy below. These guidelines do not apply to either trust funds or pension funds which operate under a different regulatory regime.

The key intention of the Guidance is to maintain the current requirement for councils to invest prudently, and that priority is given to security and liquidity before yield. In order to facilitate this objective, the guidance requires this Council to have regard to the CIPFA publication Treasury Management in the Public Services: Code of Practice and Cross-Sectoral Guidance Notes. This Council adopted the code on 01/03/2010 and will apply its principles to all investment activity. In accordance with the Code, the Director of Corporate Services (S151 Officer) has produced its treasury management practices (TMPs). This part, TMP 1 (1) covering investment counterparty policy requires approval each year.

Annual investment strategy – The key requirement of both the Code and investment guidance are to set an annual investment strategy, as part of its annual treasury strategy for the following year, covering the identification and approval of the following:

- The strategy guidelines for choosing and placing investments, particularly non-specified investments which includes the Council being an ethical investor who will give consideration to the environmental, social and governance issues (ESG) when making treasury investment decisions
- The principles to be used to determine the maximum periods for which funds can be committed.
- Specified investments that the Council will use. These are high security (i.e., high credit rating, although this is defined by the Council, and no guidelines are given), and high liquidity investments in sterling and with a maturity of no more than a year.
- Non-specified investments, clarifying the greater risk implications, identifying the general types of investment that may be used and a limit to the overall amount of various categories that can be held at any time.

The investment policy proposed for the Council is:

**Strategy guidelines** – The main strategy guidelines are contained in the body of the treasury strategy statement.

**SPECIFIED INVESTMENTS:** These investments are sterling investments of not more than one-year maturity, or those which could be for a longer period but where the Council has the right to be repaid within 12 months if it wishes. They also include investments which were originally classed as being non-specified investments, but which would have been classified as specified investments apart from originally being for a period longer than 12 months, once

the remaining period to maturity falls to under twelve months. These are considered low risk assets where the possibility of loss of principal or investment income is small. These would include sterling investments which would not be defined as capital expenditure with:-

- 1) The UK Government (such as Debt Management Account deposit facility, UK Treasury Bills or a Gilt with less than one year to maturity).
- 2) Supranational bonds of less than one year's duration
- 3) A local authority, housing association, parish council or community council
- 4) Pooled investment vehicles (such as money market funds) that have been awarded a high credit rating by a credit rating agency. For category 4 this covers pooled investment vehicles, such as money market funds, rated AAA by Standard & Poors, Moody's and/or Fitch rating agencies

Within these bodies, and in accordance with the Code, the Council has set additional criteria to set the time and number of monies which will be invested in these bodies. These criteria are set out in the main report.

**NON-SPECIFIED INVESTMENTS:** These are any investments which do not meet the specified investment criteria. The identification and rationale supporting the selection of these other investments and the maximum limits to be applied are set out below. Non specified investment would include any sterling investments with:

	<b>Non-Specified Investment Category</b>	<b>Limit £</b>
A	<b>Gilt Edged Securities</b> with a maturity of greater than one year. These are Government Bonds and so provide the highest security of investment and the repayment of principal on maturity. Similar to category (a) above, the value of the bond may rise or fall before maturity and losses may accrue if the bond is sold before maturity.	£5m
B	<b>The Council's own banker</b> if it fails to meet the basic credit criteria. In this instance balances will be minimised as far as possible	£1m
C	<b>Any Bank or Building Society</b> that has a minimum long term credit rating of AA, for deposits with a maturity of greater than one year (including forward deals in excess of one year from inception to repayment).	£2m
D	Enhanced Money Market Funds AA rated	£2m
E	Corporate Bond Funds	£2m
F	Local/Community Bonds	£2m
G	Local Authority Property Asset Fund	£4m

H	Certificates of Deposit	£2m
I	Covered Bonds	£1m
J	Property Funds – The use of these instruments can be deemed to be capital expenditure, and as such will be an application (spending) of capital resources. This Authority will seek guidance on the status of any fund it may consider using	£4m

This Authority will seek further advice on the appropriateness and associated risks with investments in these categories.

The monitoring of investment counterparties – The credit rating of counterparties will be monitored regularly. The Council receives credit rating information (changes, rating watches and rating outlooks) from Link Treasury Services as and when ratings change, and counterparties are checked promptly. On occasion ratings may be downgraded when an investment has already been made. The criteria used are such that a minor downgrading should not affect the full receipt of the principal and interest. Any counterparty failing to meet the criteria will be removed from the list immediately by the Director of Corporate Services (S151 Officer), and if required new counterparties which meet the criteria will be added to the list.

A variety of investment instruments will be used, subject to the credit quality of the institution, and depending on the type of investment made it will fall into one of the above categories.

Accounting treatment of investments. The accounting treatment may differ from the underlying cash transactions arising from investment decisions made by this Council. To ensure that the Council is protected from any adverse revenue impact, which may arise from these differences, we will review the accounting implications of new transactions before they are undertaken.

## APPENDIX E

### APPROVED COUNTRIES FOR INVESTMENTS (As at 31.12.2023)

#### *Based on lowest available rating*

##### **AAA**

- Australia
- Denmark
- Germany
- Netherlands
- Norway
- Singapore
- Sweden
- Switzerland

##### **AA+**

## **APPENDIX F**

### **TREASURY MANAGEMENT SCHEME OF DELEGATION**

#### **(i) Full Council**

- Receiving and reviewing reports on treasury management policies, practices and activities.
- Approval of annual Treasury Management Strategy and Mid-Year Review Treasury Management Indicators.

#### **(ii) Corporate Policy and Resources Committee**

- Approval of/amendments to the organisation's adopted clauses, treasury management policy statement and treasury management practices.
- Approval of the division of responsibilities.
- Receiving and reviewing regular monitoring reports and acting on recommendations.
- Approving the selection of external service providers and agreeing terms of appointment.
- Mid-Year Review of Treasury Management Indicators

#### **(iii) Governance and Audit Committee**

- Review and scrutiny of the Treasury Management Strategy, policy and procedures and making recommendations to the full Council.

## APPENDIX G

### THE TREASURY MANAGEMENT ROLE OF THE SECTION 151 OFFICER

The S151 (responsible) officer

- Recommending clauses, treasury management policy/practices for approval, reviewing the same regularly, and monitoring compliance.
- Submitting regular treasury management policy reports.
- Submitting budgets and budgets variations;
- Receiving and reviewing management information reports.
- Reviewing the performance of the treasury management function.
- Ensuring the adequacy of treasury management resources and skills, and the effective division of responsibilities within the treasury management function.
- Ensuring the adequacy of internal audit and liaising with external audit.
- recommending the appointment of external service providers.
- Preparation of a capital strategy to include capital expenditure, capital financing, non-financial investments and treasury management, with a long-term timeframe
- Ensuring that the capital strategy is prudent, sustainable, affordable and prudent in the long term and provides value for money
- Ensuring that due diligence has been carried out on all treasury and non-financial investments and is in accordance with the risk appetite of the authority
- Ensure that the authority has appropriate legal powers to undertake expenditure on non-financial assets and their financing
- Ensuring the proportionality of all investments so that the authority does not undertake a level of investing which exposes the authority to an excessive level of risk compared to its financial resources
- Ensuring that an adequate governance process is in place for the approval, monitoring and ongoing risk management of all non-financial investments and long-term liabilities
- Provision to members of a schedule of all non-treasury investments including material investments in subsidiaries, joint ventures, loans and financial guarantees
- Ensuring that members are adequately informed and understand the risk exposures taken on by an authority
- Ensuring that the authority has adequate expertise, either in house or externally provided, to carry out the above
- Creation of Treasury Management Practices which specifically deal with how non treasury investments will be carried out and managed, to include the following: -
  - Risk management (TMP1 and schedules), including investment and risk management criteria for any material non-treasury investment portfolios.
  - Performance measurement and management (TMP2 and schedules), including methodology and criteria for assessing the performance and success of non-treasury investments.

- Decision making, governance and organisation (TMP5 and schedules), including a statement of the governance requirements for decision making in relation to non-treasury investments; and arrangements to ensure that appropriate professional due diligence is carried out to support decision making.
- Reporting and management information (TMP6 and schedules), including where and how often monitoring reports are taken.
- Training and qualifications (TMP10 and schedules), including how the relevant knowledge and skills in relation to non-treasury investments will be arranged.

## **APPENDIX H**

### **CAPITAL INVESTMENT STRATEGY 2024/25 – 2028/29**

#### **1. Introduction**

The Council is required to approve a Capital Investment Strategy in accordance with the Prudential Code for Capital Finance in Local Authorities.

The Capital Investment Strategy provides a high-level overview of how capital investment, capital financing and treasury management activity supports the provisions of services. It considers associated risks and how they are managed and ensures that future financial implications are identified to inform future year's budgets and financial sustainability.

The Strategy forms part of the Council's overall Corporate Planning Framework. It provides a mechanism by which the Council's capital investment and financing decisions can be aligned with the Council's corporate priorities and objectives over a medium term (five year) planning horizon and ensures that the revenue implications of investments are both affordable and sustainable.

The strategy provides a framework for determining the relative importance of individual capital projects. It defines how the capital programme is to be formulated, and it identifies issues and options that influence revenue and capital spending and sets out how the resources will be managed.

Key elements of the strategy.

- Ensures investments meet our Corporate Plan objectives
- Incorporates the requirements of the Asset Management Plan
- Enables the development of a Capital Investment Programme over the medium term (5 years)
- A framework which will identify priorities for the use of resources for investment.
- Decisions are based on sound business cases.
- Risks are identified and mitigated where possible
- Directly links to the Treasury Management Strategy ensuring an affordable and sustainable Capital Investment Programme in adherence to legislation and the Prudential Code.
- Informs the Medium-Term Financial Plan by identifying the revenue impacts of investment decisions.
- Incorporates an annual review to ensure the programme still meets our priorities.
- Considers innovative solutions to funding.

## 1. Principles Supporting the Capital Investment Strategy

### a) Strategy Principles

- The investment programme will support the Council's strategic priorities, therefore, the capital investment programme will link to all key strategic planning documents: specifically the Corporate Plan, Executive Business Plan, Medium Term Financial Plan and the Asset Management Plan.
- Schemes within the programme will be prioritised on an authority wide basis and the process of assessing investments, against specific criteria, will optimise the benefit and relative importance of potential schemes.
- Responsible Investing (RI) - investing in opportunities that seek to generate both financial value and sustainable growth,
- Socially responsible investing (SRI), also known as sustainable, socially conscious, "green" or ethical investing (ESG), as well as any investment strategy which seeks to consider both financial return and social good.

### b) Capital Investment Policy

The Capital Investment Strategy will be underpinned by a Land and Property Investment Policy. The policy does not describe detailed operational investment activity but does describe the framework, and principal [underlying] considerations, which the Council will follow when reviewing and subsequently agreeing investment opportunities. It is designed to support the goals and objectives as outlined in the Corporate Plan, the general objectives of a UK public sector service provider and the very specific aims; goals and aspirations of the Council members; executive officers and their teams.

### c) Finance Principles

- The overarching principal is the commitment to achieve affordable capital investments over the longer term.
- To pursue all available external funding options and opportunities for leverage of external resources.
- Ensure evaluation for value for money investments by whole life costing (where applicable) and by having robust Business Cases with full financial modelling, and appropriate due diligence in estimates in order to inform the full financial implications
- To develop partnerships, including the pursuit of shared services, joint ventures and community arrangements, where appropriate, to achieve the Council's investment aspirations and value for money.
- Monitoring and evaluation of approved budgets will form part of the quarterly budget monitoring reports.
- Monitoring and evaluation of approved Programmes and projects will form part of Performance Management.
- Encourage community engagement by informing on priorities and consultation on proposals.

- To invest in non-treasury activities to support ongoing sustainability in the delivery of services.
  - Regularly review Business Cases as schemes are developed and update financial models to inform future budget impacts.
- d) Asset Management Principles

**The Asset Management Policy ensures that.**

- We will take all reasonable and practical steps to ensure the health, safety and wellbeing of staff, visitors and contractors who use or visit our buildings, land or property and who use or are in contact with supporting asset infrastructure.
- We will ensure that all our buildings and land and property assets are fully compliant with current legal requirements, are fit for purpose and managed and maintained in accordance with best practice.
- We will ensure that infrastructure supporting our physical assets is safe and fully compliant with relevant legislative and regulatory requirements.
- All activity on our assets will be carried out in compliance with relevant legislative and statutory requirements.
- We will assess asset related risks and manage such risk in accordance with our corporate risk management policy or in accordance with procedures relevant to the specific asset, its use and function.
- We will retain and/or acquire physical assets which are appropriate to our business and function and dispose of those assets which are not fit for purpose, or which cannot support our business or investment criteria.
- We shall continue to actively develop our asset management systems; processes and procedures in a way which is appropriate; efficient; transparent and sustainable and which supports the best management outcomes for our physical assets.
- We shall continue to train and develop staff across the asset management discipline and apply technology and innovation where practical.
- We shall seek continual improvement of our management capability and activities to ensure value for money for all stakeholders.

**3. Capital Investment Priorities**

The Council's proposed Capital Investment Programme 2023/24 will support the Corporate Plan's key themes.

- Our People – Health and Wellbeing, Leisure, Skills, Vulnerable Groups and Communities

- Our Place – Economic Growth, External Investment, Social Regeneration, Infrastructure, Enhanced Environment
- Our Council – Finances, Structures, Partnerships, Policies, Governance

The Council's financial planning process ensures that the decisions about the allocation of capital and revenue resources are taken to achieve a corporate and consistent approach. The key corporate documents and relevant linkages with this strategy include.

- The Corporate Plan – priorities for the medium term
- The Medium-Term Financial Plan - incorporates the Financial Strategy, revenue budget financial impacts of capital investment decisions.
- The Reserves Strategy- prioritises the use of reserves for capital and revenue purposes.
- The Treasury Management Strategy (including Investment Strategy) informs the affordability and sustainability of prudent investment decisions.
- The Commercial Portfolio Strategy – informs how acquisitions of investment properties will be made on a risk-based approach
- The Value for Money Strategy – Ensuring VFM is achieved from investment decisions.
- The Housing Strategy – Supporting housing growth and regeneration within the district.
- The Land and Property Investment Strategy -
- The Asset Management Policy – Investment needs of our own land and property holdings
- Service Plans – Investment need for delivery of quality services

#### 4. The Capital Investment Strategy Process

The strategic approach to revenue and capital investment decisions needs to be formalised to ensure that our resources are directed to the most appropriate schemes which both deliver our corporate priorities, and which are based on sound business cases. Assessment and prioritisation of capital investments schemes are based on uniform criteria.

Therefore, the Capital Investment Strategy Process has been developed which will ensure that prioritisation of investments is directed to deliver Corporate Objectives and delivery of the Executive Business Plan and Service Business Plans in addition to generating returns to support delivery of core services.

The process for includes:

- Review existing Capital Programme, timing, budget requirements etc.
- Annual review of existing Projects
- Asset Management Plan – detailed costs of required investment in property portfolio and property assets to be disposed.
- Review of asset replacement programmes
- Consideration of financing availability i.e., Earmarked Reserves, Grant funding, Capital Receipts and Prudential Borrowing

- Business Planning – identifying new schemes and projects for evaluation both capital and revenue.
- Evaluation of all proposed schemes against scoring matrix.
- Consider core service funding requirements and opportunities to invest in non-Treasury assets to generate returns

The final approved Capital Investment Programme and its financial implications are included within the Medium-Term Financial Plan, submitted to the Council annually in March for approval.

Fully costed and appraised business cases for each scheme will be presented to a relevant Board for consideration prior to any decision being made.

The Capital Programme consists of 4 levels of activity.

- Pre-Stage 1 – Business Case in preparation
- Stage 1 – Budget approved – requires full business case
- Stage 2 – Business case approved in principal or awaiting funding
- Stage 3 and Business as Usual (BAU) – Approved to spend and funding secured

The investment and the ongoing revenue implications of each scheme are ascertained from the financial implications and appraisals within the business case.

The Capital Investment Value is assessed against the capital definition, and deminimis limits (£10k).

Revenue Implications – include the impact on revenue budgets for running costs/additional staffing etc. and the impact of the cost of borrowing or loss of investment interest if capital receipts and revenue reserves are to be utilised.

## 5. Governance of the Capital Investment Programme

In accordance with the Constitution and governance arrangements, the Council reviews its capital requirements and determines its Capital Programme within the framework of the MTFP and as part of the annual budget process. Resource constraints mean the Council continually needs to prioritise expenditure in light of its aims and priorities and considers alternative solutions.

To ensure that available resources are allocated optimally, capital programme planning is determined in parallel with service and revenue budget planning processes within the framework of the MTFP.

New programmes of expenditure will be appraised following a clearly defined Business Case gateway process.

The Council will approve in principal the Capital Investment Programme, and will approve the release of funding for replacement and renewal programmes. This is undertaken annually in March as part of budget setting and the approval of the Medium-Term Financial Plan.

The Governance and Audit Committee will provide assurance on this Capital Investment Strategy.

Corporate Policy and Resources Committee will be responsible for approving release of funding for the Capital Investment Programme and will therefore receive reports for each scheme detailing the business case, cost, proposed funding and revenue implications.

Corporate Policy and Resources Committee will receive quarterly monitoring and update reports which may include details of.

- New capital investment schemes
- Slippage in programme delivery
- Programmes removed or reduced
- Virements (budget movements) between schemes
- Revisions in spend profile
- Overspending
- Capital acquisitions and disposals
- Loan advances and outstanding loan balances

Progress on specific programmes will also be monitored in relation to projects through the Performance Monitoring reporting framework.

The Programme Board will receive monthly highlight reports

The Management Team will receive quarterly monitoring reports and any exception reporting.

Budget Managers will receive monthly monitoring reports.

## 6. Capital Financing

The funding of Capital schemes can come from a number of resources, the use of external resources will take precedent.

- Prudential borrowing
- Revenue contributions and Earmarked Reserves
- Capital Receipts
- External grants and contributions (including S106 and Community Infrastructure Levies (CiL))
- Leasing
- Other sources – i.e., partnerships or private sector involvement

This strategy, the outcomes of which will inform the MTFP, is intended to consider all potential funding options available to the Council and to maximise the financial resources available for investment in corporate priorities and service provision and improvement.

To deliver our strategic objectives, especially in relation to economic and housing growth, regeneration, in addition to investment in commercial property,

which is designed to provide a revenue return, significant levels of investment will be required, which will result in a borrowing need.

## 7 Prudential Borrowing

The Council has discretion to undertake Prudential borrowing to fund capital projects with the full cost of that borrowing (interest and minimum revenue provision) being funded from Council revenue resources and/or capital receipts. This discretion is subject to complying with the Code's regulatory framework which essentially requires any such borrowing to be prudent, affordable and sustainable. Prudential borrowing provides an option for funding additional capital development however it has to be funded each year from within the revenue budget and by generating additional ongoing income streams from the investment.

Given the pressure on the Council's revenue budget in future years, prudent use will be made of this discretion in cases and only where there is a clear financial benefit, such as "invest to save", "invest to earn". Consideration will only be given to commercial investments where returns are expected to be higher than the revenue costs of the debt, provision of loans where principal repayments will be utilised as proxy for MRP, borrowing or major regeneration schemes which do not increase revenue expenditure levels in the longer term but provide a beneficial economic and or social impact.

The Council will remain cautious and prudent in the extent of prudential borrowing undertaken to fund new capital investment.

Where prudential borrowing is utilised to fund Capital Investment, financial implication considerations will be provided including the risks and opportunities of the investment over both the payback period and over the repayment period of any debt taken out.

## 8 Revenue Contributions and Earmarked Reserves

Our continued prudent approach is to set aside revenue resources to fund capital replacement programmes and asset management funding.

New Homes Bonus Grant will continue to be set aside for the purpose of investment in growth and regeneration (economic and housing) and this strategy has been included in the MTFP.

We will consider future Earmarking of Reserves for service investment needs, invest to save and invest to earn projects and enhancements to our own property assets, in addition to consideration of revenue contingencies, volatility and budget smoothing.

Our own resources will therefore be utilised to fund those schemes which provide a Socio-Economic return on investment, invest to save schemes which achieve efficiencies, and investment in our operational service asset needs.

## 9 Capital Receipts

Capital receipts generated from the following sources and where appropriate utilised as detailed.

- Loans principal repayments – used to repay prudential borrowing
- Receipts from Asset Disposal (operational property assets or surplus land)
- Commercial Portfolio Properties – repayment of borrowing
- Share of RTB Housing Transfer Agreement – future investment
- Insurance settlements – replacement of asset

## 10 External Grants and contributions (incl S106 and Community Infrastructure Levy (CiL))

The Council will actively pursue grants and contributions and other innovative solutions to funding of capital investment schemes. This funding will be utilised in the first instance.

## 11 Leasing

The use of leasing will be undertaken where alternative funding is not available for vehicles or minor equipment and the revenue budget does not allow for a full capital repayment. Where there is a robust business case then the option of leasing may be considered.

## 12 Other Sources of Funding

There are a range of other potential funding sources which may be generated locally either by the Council itself or in partnership with others i.e., a growing number of private organisations are showing interest where clear joint benefits exist. Each case will be subject to specific financial appraisals and appropriate governance arrangements.

## 13. Investment in Commercial Properties (Non-Treasury Investments)

Any acquisition of Commercial Properties will be in accordance with the Commercial Portfolio Strategy and are being acquired to support delivery of services in a financially sustainable organisation. Up to £30m has been approved for investment in Commercial Property in support and protection of Council Services.

Appropriate experts are engaged as required.

All assets will be assessed against a set criteria and the Chief Executive and the Leader of the Council have delegated Authority to complete on the acquisition of assets which score 50 or more out of 70. Any asset which falls below this threshold or registers a zero against any criteria may still be considered but specific justification will need to be provided and the decision to proceed taken to the Corporate Policy and Resources Committee for approval.

An annual review will be undertaken of the Commercial Property Portfolio to ascertain whether its fair value is sufficient to provide security against loss against the capital investment, and therefore adequate to meet the cost of outstanding borrowing.

Under the Minimum Revenue Provision (MRP) Policy, there will be an annual MRP charge for borrowing undertaken to finance Commercial Properties in line with the latest guidance from DLUHC.

A Valuation Volatility Earmarked Reserve has been created with a target balance of 5% of purchase price of the portfolio, which will reduce over the medium term, reflecting the introduction of an annual MRP charge to reduce outstanding prudential borrowing. This will help mitigate any financial loss of investment upon the sale of an asset should there be any shortfall against outstanding debt. A proportion of the annual revenue income generated from the investment will be allocated for risk provision.

A Commercial Contingency revenue base budget is also included within the MTFP to mitigate the risk of not achieving the desired level of yield from the Portfolio in year.

These investment assets are not deemed to be liquid over the short term but are likely to be held for the medium term of 5-10 years.

A number of prudential indicators in relation to these investments are contained within the Treasury Management Strategy and will be monitored throughout the year.

#### 14. Risk

All capital projects have a risk register, with all risks affecting the project considered.

A specific risk of capital investment is the impact on the Council's VAT partial exemption (recovery of exempt VAT up to 5% of overall VAT). If exempt VAT exceeds 5% the whole amount is then irrecoverable. Each scheme is therefore assessed for its impact

#### 15. Conclusion

The Capital Investment Strategy is a working document, which enables the Council to make informed rational capital investment decisions to achieve its corporate priorities and objectives. It provides a framework for determining the relative importance of individual projects.

The strategy will be reviewed annually to ensure that it remains relevant and effective.
